SUMMARY

Analytical graduate skilled in SQL, Excel, Power BI, Python, and BigQuery, with hands-on experience in business analysis, data visualization and product-focused problem-solving.

SKILLS

Data & Analytics: SQL, Python, Excel, Google BigQuery, Data Cleaning, EDA

Product & UX: Product Analytics, A/B Testing, User Behavior Analysis, UX

BI & Visualization: Power BI, Tableau, Data Visualization, Dashboarding

Tools: Git, GitHub, Jupyter Notebook, VS Code

PROJECT

Temporary Address Lifecycle Management System

github.com/manirachamallu/Address_Management

- Designed a **Smart Temporary Address Management** feature for food-delivery platforms, mapping the complete address lifecycle from creation to expiry, archival, restoration, and extension.
- Defined **8+ product KPIs and 6+ tracking events** to measure address adoption, checkout friction, expiry behaviour, restoration, and delivery accuracy.
- Built a product analytics framework covering **SQL, database design, funnel analysis, and A/B testing**, translating user behaviour into measurable product decisions.

Zepto Inventory & Sales Analysis

github.com/manirachamallu/Zepto-Sale-Analytics

- Analyzed **5,000 orders across 6 cities and 5 product categories** using **SQL and Google BigQuery**, generating **₹38.69L in revenue, 20,952 units sold, and ₹831.79 AOV** through KPI and performance analysis.
- Evaluated **delivery performance for 4,651 delivered orders**, identifying a **61.02% late-delivery rate** and **36.56-minute average delivery time**, highlighting a significant SLA optimization opportunity.
- Built **product-level profitability and opportunity analysis using SQL joins and ranking logic**, identifying **3 high-profit growth opportunities**—Carrot, Coffee, and Cheese—with **14–21% margins** and revenue ranging from **₹1.94L–₹2.72L**.
- Used **SQL joins, CTEs, aggregations, CASE logic, and window functions** to evaluate sales, delivery, inventory, and product performance.

EDUCATION

B.Tech in Electronics and Instrumentation Engineering
