SUMMARY

Analytical graduate skilled in SQL, Excel, Power BI, Python, and BigQuery, with hands-on experience in business analysis, data visualization and product-focused problem-solving.

SKILLS

Data & Analytics: SQL, Python, Excel, Google BigQuery, Data Cleaning, EDA

Product & UX: Product Analytics, A/B Testing, User Behavior Analysis, UX

BI & Visualization: Power BI, Tableau, Data Visualization, Dashboarding

Tools: Git, GitHub, Jupyter Notebook, VS Code

AI & Engineering: FastAPI, LLM Integration, AI-assisted Analytics

PROJECTS

Temporary Address Lifecycle Management System

addressmanagementprototype.netlify.app

- Designed a **Smart Temporary Address Management** feature for food-delivery platforms, mapping the complete address lifecycle from creation to expiry, archival, restoration, and extension.
- Defined **8+ product KPIs and 6+ tracking events** to measure address adoption, checkout friction, expiry behaviour, restoration, and delivery accuracy.
- Built a product analytics framework covering **SQL, database design, funnel analysis, and A/B testing**, translating user behaviour into measurable product decisions.

InsightAI — AI-Powered Analytics Copilot

insight-ai-green-xi.vercel.app

- Built an **AI-powered analytics copilot** using React, FastAPI, MySQL, Python, and Groq that converts natural-language business questions into validated SQL, KPIs, charts, and business insights.
- Designed a **schema-aware Text-to-SQL pipeline** with SQL validation, automatic query correction, read-only safeguards, and controlled LLM context to improve reliability.
- Deployed the application using **Railway/Vercel** with an **Aiven cloud** database, implementing environment-based secret management and **Git/GitHub** version control.

EDUCATION

B.Tech in Electronics and Instrumentation Engineering
